Recommendations

Current progress
This is currently finished
- Viewing what semesters and modules a curriculum has.
- Viewing the skillmatrix a student should posses after finishing a semester.
- Viewing a module's information
- Viewing the qualifications table. This table displays which qualifications are reached by which learning goals of what modules.
- A simple login functionality
- Editing a complete module

advise for future implementation

As one can read at the previous part, the viewing part is completely implemented. The publishing and editing part is partially implemented. Deduced from this is that the publishing and editing should be fully completed. Following is a list with suggestion with things that can be done in the future.

- Editing a semesters
- Editing a curriculum
- Creating publishing functionality that only publishes partial module descriptions
- Creating a publishing functionality that generates all module descriptions from one click
    - This includes generating partial module descriptions
- Creating a role based login system
- Creating a versioning system which keeps track of changes
- Add functionality which gives the admin user permission to create/change/remove roles.
- Make the system choose a study program prior to selecting curricula/semesters/modules/qualifications
- Making it possible to create/archive/delete curricula/semester/modules
- Make it possible to create/view/update/archive/delete study programs
- Integrate system with Fontys (connect.fontys.org)

The importance of these suggestions depend on the customers wishes, so we didn't rank them.
